### About This Game

HoloFist is a tie-in game for a cartoon that doesn't exist! A turn based battle game where reaction times matter, with a visual style that attempts to imagine how old school pixel RPGs might look in 3D.

With the help of your colourful 'Holobuddies', like Mathmoth, Pieceratops and Pakoon, you travel the island of Fistopia to clear out the haywire robots, toxic Blimes and other dangerous enemies that have overrun the island.

This first game from Edgehog attempts to infuse action into what you would expect from a turn based RPG, using timing based button presses to deal extra damage, or even block incoming attacks.
