First it is hard to get how to make the enough points to pass each level, but after getting used to it Header Goal VR takes you into game and makes you feel like a football player.

Graphically, Header Goal is so far one of the bests and I am sure you will enjoy the experinxe of being axel rix as much as I did. If you have htc vive, you need to purchase this one for sure.

I'm looking forward to seeing full version of this game.. You think Portal is too easy? If you want a real headache this game is for you!. A must have. I was bored about the teleport mode...

This app saved my life.

Thanks to the dev :D. This game can not boast of cool graphics. But is perfect for killing time. Overall happy with the purchase.. This game is tragic.

- You can't set up automatic sparings and every 3 days you must do it manually
- It's compleatly boring, I can't find any excitment in this game. You just repeat the same thing's over and over. And there is not too much to do in this game
- Boxer didn't make his weight two times, gym bancrupted. After two hours of game. You have no any impact on this.
- Game only in window
- No any music or sound effect's
- Graphics is terrible even for manager

Only positive thing in this game is really good fighting sytem, your desicions during the fight matter.

This game had big potential but boredom and losing before first fight killed it.

At this moment this game is worth 0.

Overall: 0,5/10. I like it! Havent been able to play multi player yet.. This is a nice game. I enjoyed playing the campaign. Anyway.. since there is not much in terms of replayability, get it in a sale.. Very rough and amateur. I'm sorry. Can't recommend it.. Just play this game now. It's worth it.

I waited anxiously for this game's release, especially after its predecessor (By no relation) Marble Blast Ultra for my Xbox 360. However, upon start, I found it crashed when going full screen. My game recording software (D3Dgear, Shadowplay) was unable to follow the process and crashed. I turned all recording software off, and the game consistently crashed. The graphics are great in game, but if you fall off a level the game hesitates. Watching my CPU, it took 90% for thirty-seven seconds before the level would reset. This was consistent. Turning the graphics up or down yielded no distinguishable difference. I was excited, now I'm not.

NOT Recommended

(My specs, for comparison: i7 4720HQ, GTX 970M, 32GB 1600MHz RAM). A cute little dungeon crawler fatally marred by poor controls and a poorly ported mini-game. I voted no, but I'd vote neutral if given the option.

Pros:

- Setting
- Voice acting
- Decent character variety

Cons:

- Short campaign
- Relies on steep difficulty curves to drag out gameplay
- Little variety
- You spend more time sneaking around than you do actually playing the strategy portion of the game
- Buggy & unpolished
- Limited viability in the character choices. You either choose the ones who can CC or you lose.
- Cliff-hanger ending

<https://www.youtube.com/watch?v=Q49CcRbR6l0>. Best game 2017 (to be honest it's a fun little game and if you have it for 10 cents like I did it's worth just for that extra Steam game). I like this. A moderately epic tribute to the early days of 8-bit. Snappy controls, creative level design, and moderate replayability highlight a platformer that's worth your time (and the asking price).

[I mean, the story is godawful, but that too is faithful to the era that the game is emulating. And you're not buying ultra-retro games for the story.](#)

[This game really needs to be better-known.. 10/10 anime waifus, lots of ♥♥♥♥♥♥♥♥ ♥♥♥♥♥♥♥♥s. would play again. It was a really nice first person puzzle game, with an interesting story! The puzzles were challenging and, unlike other games where the game does the puzzle for you, you had to think for yourself!](#)

[The music is spot on like the voice actors! Really great job there.](#)

[The graphics are charming, beautiful and sometimes a bit scary, with excellent lighting!](#)

[This is not a game you just run through and put away. This is a game you take your time, think about it, play for a bit, take a break and continue. You can be done with it in a few hours but it feels longer. Excellent game!](#)
