About This Content

CHALLENGING, FUN & AFFORDABLE - A ROUTE FOR EVERYONE

Midwestern Branch is primarily a industrial route based upon freight operations in the "breadbasket" region of the USA.

While the main line is owned and operated by BNSF, the branch line uses ex-Milwaukee Road units in both SD40-2 and GP38-2 styles to help serve the industries that are in the towns of Littleport, Levitt, Cylinder, and Mill Town.

So what are you waiting for? There's work that has to be done on the line. Good luck and have a safe trip!

Includes 6 sessions with detailed gameplay:

- Grain Collector
- Lumber Mill Duties
- Mill Town Switching
- Night of the Twister

- Transfer Run
- Base Session

Route and sessions created by Hiawathamr and priced to ensure great value for every Trainz fan.

Really good and fun route for mostly local work. This is great to get you up to speed driving in Tane, also transfers to Trainz 2019 if you own\/buy it. Pretty hard to see in the Night of the Storm mission, but then it is at night during a storm so... Great fun for the money!!. Simple route with 6 sessions . When bought it will be installed from TANE Download Station, takes a while.
